

Bulletin n. 1 of the DEVEN3C Project

Development of Entrepreneurial Competencies in Moroccan Universities: Creativity, Knowledge and Culture

If you are thinking about entrepreneurship or creating your own start-up business, you are also part of DEVEN3C. Stay for a while and we'll let you know about the latest news regarding self-employment and development in Europe and Morocco.

[Who are we? What do we do? Which are our goals? Have a look to our brand new two-page leaflet!](#)

The main objective is to encourage self-employment among students as a professional outlook, by establishing support services for the creation of businesses and promoting it as a part of the academic curricula at open access learning institutions.

Meeting of the DEVEN3C project

* Kick-off meeting, held in Cádiz in march 2014

The first DEVEN3C meeting took place in Cádiz last march, in order to boost the project development. Presentations by each partner, fixing dates and Work packages to be done, have been many of the issues considered.

Each partner presented their own Institution.

Google Ventures invests in Europe

Wander through the excellent Science Museum in London, and you'll see inventions that transformed history. Like Puffing Billy, one of the world's first steam locomotives; or Charles Babbage's difference engine, a Victorian predecessor to the modern computer; or penicillin, the wonder drug that revolutionized the treatment of disease. These marvels from the past still influence our lives today, and are tangible examples of how fearless exploration and entrepreneurship can literally change the world...

I don't work, I have fun!

Adrián Ortiz, a 29 years old young entrepreneur leads six companies, and came to the University of Cádiz to tell the students about his own professional career and give some advice.

"I don't know anybody with a good idea who hasn't been able to carry it out because of the lack of funding. Maybe, there are problems to find resources if you are thinking starting a bar up just at the corner of your house, but you won't have problems to find resources for an original project"

Entretien avec Mohamed Semmaa, coordinateur général – Réseau GENIE Maroc

«L'université entrepreneuriale pour relever les défis de l'employabilité des jeunes diplômés»

Cet événement représente une plateforme d'échange entre étudiants, jeunes diplômés, décideurs publics, universitaires et professionnels du monde des affaires et de l'entreprise. Des ateliers et des séances de formation seront animés par un panel important de personnalités, en plus de plusieurs séances de partage d'expériences avec des entrepreneurs qui ont réussi leurs projets. L'événement verra aussi l'organisation de la finale du Concours du meilleur étudiant entrepreneur au Maroc.

PRISA INN (EL PAIS journal) will encourage the talent and innovation of entrepreneurs

PRISA INN will encourage the talent and innovation of entrepreneurs. A call has been launched under the LAB programme, in order to support the creation of startups. PRISA INN, the latest brand new supporting unit of digital business and startups of PRISA, is already working with the aim of encouraging the creation of new ideas and technological business projects, and increasing their success possibilities.

Ce projet a été financé avec le soutien de la Commission européenne
